

REVIVING YOUR EQUIPMENT

Industris CC's Laboratory and Pilot Plant Equipment Refurbishment Services

W W W . I N D U S T R I S - C O . C O M

INTRODUCTION

NEW DIVISION OF INDUSTRIIS CC REFURBISHMENT OF LABORATORY AND PILOT PLANT EQUIPMENT

Welcome to Industris CC, we are proud to launch our new division of our company that specializes in **Laboratory and Pilot Plant Equipment refurbishment**. Our team of experienced engineers and technicians are dedicated to providing quality refurbishment services for a wide range of I

As we know, equipment breakdowns can be frustrating and expensive, which is why we offer **cost-effective refurbishment solutions** to ensure that your equipment is restored to its optimal condition. With state-of-the-art technology and equipment, we guarantee that our refurbishment services will extend the lifespan of your equipment and ensure that it continues to function efficiently.

REGAIN CONFIDENCE IN YOUR EQUIPMENT!

WHY REFURBISHMENT?

Laboratory and pilot plant equipment plays a critical role in various industries, including **Pharmaceuticals, Chemicals, and Biotechnology**.

These industries rely on sophisticated equipment to conduct research, develop new products, and optimize processes. However, as equipment ages or undergoes wear and tear, it can become less efficient, less reliable, and less safe.

Refurbishing equipment can **extend its lifespan, improve its performance, reduce downtime, save money, and maintain safety standards**.

In this presentation, we will discuss our laboratory and pilot plant equipment refurbishment services and the benefits they offer to companies in need of equipment refurbishment.

REFURBISHMENT IS IMPORTANT FOR SEVERAL REASONS

EXTEND LIFESPAN

Refurbishing equipment can extend its lifespan by restoring it to its original condition or upgrading it to meet current standards. This means that companies can continue to use their equipment for longer periods of time, which can result in significant cost savings compared to purchasing new equipment.

REDUCE DOWNTIME

Downtime can be costly for companies, especially those in the research and development field where every minute counts. Refurbishing equipment can reduce downtime by minimizing the need for repairs or maintenance, improving equipment reliability, and preventing equipment breakdowns.

IMPROVE PERFORMANCE

Refurbishing equipment can improve its performance by replacing worn or outdated parts, optimizing its design, or upgrading its technology. This can result in **increased productivity, efficiency, and accuracy** of laboratory and pilot plant usage.

SAVE MONEY

Refurbishing equipment can save companies money by avoiding the high costs of purchasing new equipment, which can be particularly beneficial for small or medium-sized companies. Refurbished equipment can also be a more sustainable and environmentally friendly option compared to buying new equipment.

MAINTAIN SAFETY STANDARDS

Refurbishing equipment can help ensure that laboratory and pilot plant equipment meets **safety standards and regulations**. This is particularly important in industries where safety is a top priority, such as pharmaceuticals or chemical manufacturing.

OUR VALUES

1

SUPPLIER ASSURANCE

The consistency in our supply is of utmost importance to us. We are dedicated to **delivering top-quality service**, and we take great care in treating each machine or equipment we receive as a distinct project that requires a customized solution tailored to its intended purpose.

2

SERVICE UNDERTAKING

At Industris, we firmly believe that our customers are **our top priority**. We highly value every interaction we have with them. Our organizational culture is centered on fostering an environment of response, client connection, and care. All our team members are fully committed to upholding this culture.

3

COMPETITIVE COST

By opting for our refurbishment services, our customers obtain a high-quality equipment such as a lab mixer or blender, that is both **cost-effective and reliable**. Our refurbishment process ensures that the equipment functions optimally, with the overall cost remaining significantly lower than purchasing a new one. This approach provides you with substantial benefits and cost savings, helping customers maintain budgets and finances.

4

ANNUAL SERVICE AND MAINTENANCE

As part of our services, we also provide our customers with the option of a regular or **Annual Service and Maintenance Agreement** for all refurbished equipment. This ensures that the equipment continues to **operate at optimal levels** and remains available for use within their facility. With this agreement in place, our customers can be confident in the performance and reliability of their equipment.

OUR REFURBISHMENT PROCESS

The refurbishment process includes several steps (as shown below). Each step is performed by trained and experienced technicians to ensure high-quality work.

EMPHASIS ON QUALITY CONTROL AND SAFETY: We follows strict quality control and safety standards to ensure that all refurbished equipment meets or exceeds the original equipment manufacturer's specifications.

OVERVIEW OF THE STEPS INVOLVED

WHY CHOOSE US?

- ✔ **Experience and expertise in equipment refurbishment:** As a team of highly skilled technicians and engineers, we have over **40+ years of extensive knowledge** in the supply and maintenance of equipment used in Pharmaceutical, Chemical, Biotechnology, Food, Dairy & Medical industries.
- ✔ **Commitment to meeting customer needs and exceeding expectations:** We work closely with customers to understand their specific needs and provide customized solutions that meet or exceed their expectations.
- ✔ We offer **competitive pricing** to accommodate different budgets and financing needs.

DISCLAIMER:

Our services are intended to enhance the mechanical performance and efficiency of your equipment, but we **cannot guarantee or assume responsibility for any electrical issues that may arise.**

Thank you for considering our services, and please do not hesitate to contact us if you have any further questions or concerns.

TYPES OF EQUIPMENT WE SERVICE?

MECHANICAL RESTORATION & REFURBISHMENT

MIXERS AND BLENDERS

Ribbon mixers | Paddle mixers | Planetary mixers | V-blenders | Double cone blenders | Z-Blade Mixer | Conical Mixers | Tumbler Mixers | Rotational Mixers | Coating Pans etc.

REACTORS

Batch reactors | Continuous reactors | Pressure reactors | Glass-lined reactors etc.

CENTRIFUGES

High-speed centrifuges | Ultracentrifuges | Refrigerated centrifuges etc.

PUMPS AND VALVES

Diaphragm pumps | Peristaltic pumps | Vacuum pumps | Solenoid valves etc

WATER PURIFICATION SYSTEMS

Reverse osmosis systems | Deionization systems | Ultrafiltration systems etc.

OVENS AND FURNACES

Muffle furnaces | Drying ovens | Vacuum ovens | Forced air ovens etc

NOTE: These are just a few examples of equipment types that can be refurbished. For all other equipment types that are not listed please feel free to contact us directly on info@industris-co.com

CONCLUSION

In conclusion, laboratory and pilot plant equipment refurbishment is a **critical aspect of maintaining efficient, reliable, and safe operations** in various industries. Through our laboratory and pilot plant equipment refurbishment services, Industris CC is committed to helping companies extend the lifespan of their equipment, improve its performance, reduce downtime, save money, and maintain safety standards.

Our team of experienced engineers and technicians are dedicated to providing **high-quality refurbishment services** that meet the unique needs and requirements of our clients. If you're interested in learning more about our laboratory and pilot plant equipment refurbishment services, please don't hesitate to contact us. Thank you for your time and consideration today.
